

Vacancy Details

Job Description	
An exciting opportunity has arisen for a Design Engineer with Revit capability to join our design team in Newcastle upon Tyne, working on swimming pool and high end spa projects throughout the UK, Ireland, mainland Europe and the Middle East.	
Position:	Design Engineer/Engineering Technician
Key roles/ responsibilities	Design of specialist engineering systems for swimming pools and spas, e.g. pool water treatment, water features, movable pool structures and heat experiences; maintaining and developing relationships; assisting in management of projects profitably; development of office technical system. <i>As this is a specialist position, full training will be provided.</i>
Person Specification	
Education	HND or HNC in Engineering. Membership of engineering institute/professional body (or working towards).
Experience	Minimum 3 years working in a building services or mechanical or water engineering field, and ideally 2 years working to BIM Level 2.
Technical Knowledge	Broad engineering knowledge, ideally in a building services or water process, mechanical or chemical field; specific pool water treatment knowledge is not essential.
IT Knowledge	Revit, AutoCAD, Microsoft Office Word, Outlook and Excel.
Relationship Management	Ability to maintain and develop internal and external relationships is essential; must be able to communicate and justify your opinions and designs.
Project Administration	Able to work in accordance with the office engineering/administration systems, including ISO 9001:2015 quality management system.
Commercial Awareness	Able to work effectively, with an understanding of project profitability.
Business Awareness	Able to assist the Directors in the development and implementation of office policies, and the achievement of the business goals in the Business Plan.
Personal Motivation	Demonstrate an enthusiasm to achieve, setting high standards for self and others; proactively looks for opportunities to improve personal and team effectiveness. Candidate to wholly engage with Devin company core values.
Adaptability/ Flexibility	Ability to work effectively and harmoniously in a team or when required on own initiative, in a niche industry sector where we aim to set the standards. As role includes pool engineering, the candidate needs to be able to swim 50m as a minimum.
Benefits	
Benefits package	A salary of £30,000 - £35,000, a pension, income protection insurance, life assurance, payment of professional subscriptions, 20 days holiday per annum plus 1 week at Christmas plus statutory holidays. In addition there is a discretionary bonus scheme related to company profitability.
